

**To make a concrete waterer that will last through years of use, you need the best in concrete technology matched with the best of components.**

Air entrained concrete and superior attention to quality control throughout the entire precast process is the key to Cancrete® durability. Air entraining produces microscopic air pockets that allow any moisture in the concrete to expand and contract in these pockets, not in the concrete itself. The result is a super strong hull that can weather the freeze / thaw cycle without cracking. It's no big secret, just a lot of hard work and attention to the details.

Heavy gauge Stainless Steel is used on the valve cover, service door, ball float and all hardware.

Easy access through the large service door.

Precast hulls are made from steel reinforced, 6000 PSI, air entrained, sulphate resistant concrete.

A model for any size pen of cattle, horses or bison.

Deep through bowls are easy to clean and have 2 funnel drains in C250 and up.

No sharp corners.

Bowls are epoxy coated providing chemical protection from sodium, manure, acid and silage.

**NOTE:** For water troughs south of the north Nebraska border, cattle numbers should be adjusted based on high heat seasons, areas.

### CANCRETE® CATTLE WATERERS - SPECIFICATIONS & PRODUCT NOTES

Model	No. of Head Feeder Cattle	No. of Head Cows	Dimensions	Primary Element	Aux. Element (If required)	Weight	Capacity
CGSA50	N/A	50 Goats or Small Animals	21¼"L x 24¼"W x 14"H	300 W	1 x 98 W	260 lbs	5 gal.
CESA50	N/A	50 Horses or Small Animals	22"L x 24¾"W x 18"H	300 W	1 x 98 W	320 lbs	5 gal.
CDESA50	N/A	60 Horses or Small Animals	36"L x 27"W x 18"H	300 W	1 x 98 W	460 lbs	10 gal.
C150	1 - 200	0 - 50	33"L x 36"W x 25"H	250 W	1 x 98 W	800 lbs	19 gal.
C250	200 - 300	50 - 120	37"L x 36"W x 25"H	250 W	1 x 98 W	1000 lbs	28 gal.
C350	300 - 400	120 - 220	43"L x 36"W x 25"H	250 W	1 x 98 W	1100 lbs	35 gal.
CS75	400 - 500	220 - 350	78"L x 36"W x 25"H	250 W	2 x 98 W	1400 lbs	75 gal.
C75SWEM	400 - 500	220 - 350	78"L x 36"W x 25"H	250 W	2 x 98 W	1400 lbs	73 gal.
C450	400 - 500	220 - 350	69"L x 36"W x 25"H	700 W	2 x 98 W	1300 lbs	68 gal.
C550	500 - 600	350 - 500	93"L x 36"W x 25"H	700 W	2 x 98 W	1850 lbs	120 gal.
D800	600 - 800	500 - 650	168"L x 36"W x 25"H	700 W	2 x 98 W	3300 lbs	210 gal.

#### NOTES:

- Cancrete® bowls can be set up with Electrics, Continuous Flow, the ICE SWEEPER™ or Concrete Insulated Bowl only.
- Shipping weights are approximate.
- Dimensions are taken from measurements of the base of the hull, height is to top of drinking lip on bowl.
- All standard models are 110v.
- Standard valve assembly is 3/4" Valve W/6" Stainless Ball. Model C450 + larger use a 1" valve. Hawkeye plastic valves and plastic floats are available on request.
- The reason for two sets of specifications on "number of head" is Cows drink in groups therefore more open bowl space is required to reduce fighting and possible injury.
- Water bowls are mechanical items that require some adjusting & tweaking as all water, water pressure, and water quality is not the same in every area.
- If your bowl freezes below ground level it has nothing to do with the bowl. Contact us and we will tell you how to fix it.
- Warranty does not apply to bowls hit with a front end loader or "any" other damage done to the hull.
- Warranty void if a proper lifter or lifters are not used to place bowl.
